

FORECASTING SUN ALL SUMMER LONG!

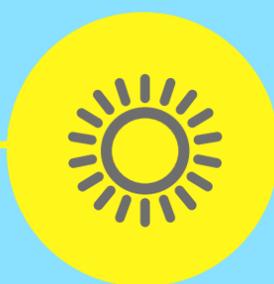

Location: New Jersey

New Jersey ranks 5th in the country for total installed solar power capacity and is 1st in solar power capacity installed per square mile. Under the 2012 Solar Act, New Jersey set a Renewable Portfolio Standard (RPS) that mandates 4.1% of electricity sales must come from solar by 2028.

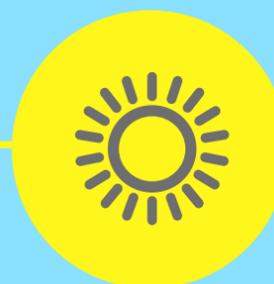

BOARD OF PUBLIC UTILITIES

The Board of Public Utilities (BPU) Clean Energy Program provides many tools for New Jersey residents who wish to learn more about the benefits of solar for their home or business

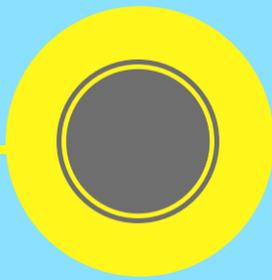

ENERGY SAGE

Energy Sage is a useful resource for discovering information about solar potential including a solar calculator, buyer's guides, and financing options

SUSTAINABLE JERSEY

Sustainable Jersey has 3 actions that can be completed by a community for points: "On-site Solar System", "Make Your Town Solar Friendly", and "Community-led Solar Initiatives"

AUGUST 21, 2017

Don't forget to look out for the Total Solar Eclipse happening later this month!
